PROFESSIONAL SUMMARY

Analyst with administrative and operational management experience in small and medium-sized businesses (SMEs) in the retail sector, specializing in databases, administration, reporting and and analysis using Advanced Excel and Power Query. Since 2022, I have built on that foundation with training in SQL, database modeling, and Power BI, expanding my ability to structure, analyze, and present information. I combine business judgment, autonomy, and attention to detail to turn manual processes into reliable, automated solutions.

TECHNICAL SKILLS

- Advanced Excel — complex functions, process automation, pivot tables, Data Model, dashboards, and query tools.
- Power Query — extraction, transformation, normalization, and integration of multiple data sources.
- Reporting — design of dashboards, management reports, and tracking boards to support decision-making.
- SQL (intermediate level) — MySQL, SQL Server, DBeaver; queries, views, functions, triggers, and stored procedures.
- Relational Databases — modeling, normalization, referential integrity, PK/FK, constraints, ETL.
- Power BI / DAX — data modeling, calculated measures, and dashboards (training projects).
- Python & GitHub — Data Science projects (EDA, Machine Learning) and code/project version control (learning/basic level).

WORK EXPERIENCE

Casa Gazquez – Córdoba, Argentina
Data Processing and Record Keeping

- Designed product and pricing databases in Excel connected to a GitHub repository via Power Query, accessible from multiple workstations.
- Automated reports and dashboards for managing insurance company accounts and monitoring discount programs, integrating tables through the Data Model.
- Normalized and structured stock, price list, and invoicing information.
- General administrative management: invoicing, accounts, and customer and supplier service.

Fuerza Neumáticos – Córdoba, Argentina
Data Processing and Record Keeping

- Built operational Excel spreadsheets for stock, price lists, daily cash, and work orders.
- Financial control, bank reconciliations, and management of check portfolios.
- Customer service, inventory management, and cash counts, alongside data processing.

EDUCATION AND CERTIFICATIONS

- **Data Processing in Excel** — Coderhouse (2022)
- **Data Analytics** — Coderhouse (2023)
- **Data Science** — Coderhouse (2023–2024)
- **SQL — Data Modeling and Database Administration** — Coderhouse (2024)
